This Emerson Piano is today one of the choice selling pianos in the whole gammt of instruments made in this land. Its merits have been explained and lauded in these columns in most unequivecal terms ever since the day when its present cales and improvements were placed upon the market. People have frequently asked us: "What is all this talk in the Musical Courier about the beauty and the scale and the tone and touch of the Emerson 1-not" and we tell them today once more what we sid then: "Go and test them yourselves, and you will indorse what the Musical Courier has stated, if you know anything about the subject."

THE REPUTATION WHICH I HAVE acquired for producing fine, well-steing and dressy garments for men has naturally suggested the question: "Why cannot the same high order of excellence be produced in laddes' wear?" Hundreds of applications were made to me by the Isdies of Washington to take orders for garments in which they wanted the highest degree of testiness and skill displayed. So namerous and conditions have been these applications that in compliance with what amounted to a positive demand I have established on the second foor of my handsome new building, an additional department for Ladies Tailorins only, which is cendacted by the finest array of talent which can be engaged either in Europe or America. The most esthetic designs of Parisles creators of fashion are by me converted into those charming realities which add such exquisite grace and beauty to the person. The magnificance of the famous Worth of the French capital is duplicated in my establishingers and the ladies of America's most beautiful metropelis may be assured that I am prepared to comply with the demands of their taste, no matter how exacting or fastidious.

timates Have Been Misrepresented. Attorney General Miller said to a STAR reporter today that he had been misrepresented story that he contemplates resigning his position the appropriations for the support of the United States courts for the next fiscal year. He said it is true that his estimates for next year are more than the appropriation for the present year by about \$1,700,000, but that as a matter of fact they are very little more than the actual expenses of the current year, for which Congress has been asked to make a deficiency appropriation. "The trouble about the matter," said the Attorney General, "is that last year I asked for what I knew was necessary, but Congress cut down the amount nearly one-third and is now called upon to make up the difference. Notwithstanding the natural increase of business I have asked for very little more for the beginning it will have to be met at the end of the year. However, the only point I wanted to make is that it is wrong to suppose that it will cost anything like \$1,700,000 more to conduct the business of the courts next year than it has cost during the current year. This impression is created by comparing the estimates with the appropriations instead of comparing the exitence of the United States. the growth of the revolutionary movement.

Dispatches are rushing to and fro from the Merican officials to the United States officers on the frontier and in the near future there will be a genuine revolution in Mexico.

It is impossible to gain any information from those high in authority, as every one is under those high in authority, as every one is under the strictest orders not to make public the telegrams, but this much is positively known that there was a battle on the 17th on Mexican soil near Guerrero, about three miles from the river, between the Mexican troops and revolutionists, with a victory for the latter.

sage from United States Consul Estes as the burg this morning saying: "Bills of health have not been clean. Two cases today." The first sentence of the above message is in response to an inquiry as to the truth of a report that the consul had decided to issue clean bills of health to vessels salling for United States ports, notwithstanding the continued existence of cholera in Hamburg. The authorities at Washton doubted the report from the first and are now convinced of its falsity.

A PARDON DENIED.—The application for the pardon of Jesse C. Nichols, convicted in Missis-

on the 19th, when ten men were killed at Coralvo, where there is a garrison. At this place five of the Mexican soldiers were burned half alive.

A courier with official information gave it out that the revolutionists gave and asked no quarter, but in every way outfought the regular Mexican soldiers, those at Coralvo being a sleepy lot of half breeds.

It also reported that another party made another raid at San Ygnacio, but did not recross to this side, but went on into Mexico. This is contrary to first reports, which were a part of the strategy of the revolutionists.
